Our Story

Evoworld believes by rethinking our consumption and switching to sustainable alternatives / practicing a sustainable lifestyle, we can solve the global waste issue we are currently facing. We aim to promote sustainable consumption by giving ecolution (eco-solution) to bridge the needs between producers and consumers in distributing products sustainably. Evoworld provides a wide range alternatives to single-use plastic items, from the biodegradable, compostable, to the edible. While we provide the solution to alleviate the world's plastic pollution, we also work closely with our partners to actively become the advocate in raising awareness about sustainable living. Alongside our focus on environmental sustainability, we ensure the community around us get the most out of our business. We implement fair trade to our suppliers and promote inclusivity in our working environment. We believe we can get our needs fulfilled without costing our earth and other's wellbeing. Evoworld works for the earth and for our people!

Our Partners

We're glad to be a part of sustainable journey of our partners. We know very well that switching to sustainable practices is not easy and takes a lot of effort, so we thank them and want to celebrate every little step. Here are partners that have chosen our bio-packaging to provide a better alternative for their customers:

Bio-bag

Our bio-bag is a bio-based polymer compound, manufactured from renewable natural materials (cassava or corn starch), as well vegetable oil derivatives. Our bio-bag doesn't contain any polyoefin plastic and consequently will not produce microplastic during its degradation process that will contaminate the food chain.

Certified:

- Acute Oral Toxicity, tested by WIL Research – Netherlands
- SNI Ekolabel for degradable bioplastic shopping bag

Frequently Asked Questions

What is this bag made of?

It is a Bio-based film made from starch, vegetable oil derivatives and other non-toxic, environmental-friendly, and naturally abundant materials. It does not contain any PLA nor any polyolefin plastic compound and so, it will not degrade into microplastics.

How will this bio-bag impact the environment?

Our bio-bag will degrade in natural condition to oxygen, carbon dioxide and water by action of microorganisms (e.g. bacteria, fungi). Our bio-bag does not need industrial composting facility to be composted. It is also safe if ingested by snails, insects, and other land and aquatic animals.

Is the ink used in printing safe for the environment?

The printing ink used on our bio-bag is alcohol-based and toxic-free.

What certifications does this bio-bag have?

Our bio-bag are certified SNI Ekolabel (71887: 2016) for degradable bioplastic shopping bags. Our bio-bag has also passed the acute oral toxicity test (by WIL Research, Netherlands).

Is the bio-bag edible?

While our bio-bag has passed acute oral toxicity test, it is not certified as food and as such, our bio-bag cannot be considered as edible.

Does it have a minimum order quantity?

Minimum order quantity is 100 pieces (no customization, with Rethink branding). For customization, the minimum order quantity is 10.000 pcs/size/design. The pricing for customization includes cylinder price (used for printing).

Is the bio bag water resistant?

Our bio-bag dissolves instantly in hot water, softens in cold water and leaves only a small amount of ash when burnt; contrary to conventional plastic which leaves molten residue behind.

How should I store this bag?

To retain the quality of the bio-bag, the products must be stored in dry and mild temperature-room. Humidity, higher temperature, direct contact with water and sunlight can affect the physical property of bio-bag and also speed up the biodegradation process.

How long is the shelf life?

The shelf life is 2 years. It means that you can store it for two years if sealed inside its original packaging before the quality starts degrading. Once the original packaging is opened, the shelf life will be shortened to less than 1 year.

How to measure the bag?

The bag is measured by width (cm) x length (cm) x thickness (micron, 1 cm = 10000 micron)

For t-shirt bags (with gussets):

A/B x C x D

A = Total width + gussets

B = Width

C = Length

D = Thickness

For griphole bags (without gussets):

A x B x C

A = Width

B = Length

C = Thickness

How many colors are available?

We have 11 basic colors for the bag. For printing, all colors are available. Here are our basic colors:

Green 803
R: 164 G: 219
B: 220

White 101
R: 255 G: 255
B: 255

Frequently Asked Questions

What is this food container made of?

It is made of natural sugarcane bagasse (fiber) that is food-grade, and free of petrochemical substances (CFC, HCFC, HFC) and toxic chemicals.

Is it completely biodegradable?

Yes, our container is environmental friendly and will completely biodegrade in 180 days in nature. It is also safe for animals since it is made of natural fiber.

Is it possible to store hot or cold food in the container?

Yes, you can store hot food up to 140°C and cold food up to -5°C.

Is it possible to store liquid with the container?

Yes, it is possible. Our container is designed to contain liquid items such as oil and water, but please note that leakage may still occur from the opening since it is not sealed.

Is it microwave and fridge safe?

Yes, you can either heat your food in our container with microwave and oven, or store it in a fridge or freezer.

How to store this sugarcane container?

Store it in room temperature (25°C) and low humidity space. High temperature and high humidity or contact with liquid while stored can affect the quality of the container.

How long is the shelf life?

The shelf life is up to 2 years if stored properly.

Can I do custom design for my order?

No, we only provide 4 different types with natural color only.

Can I put my logo on the container?

It is possible but only with stickers, not emboss.

What to do after I finish using it?

You can compost it in your home composting, no need of industrial composting facility.

Paper Straw

Evoworld straw is made of paper that last to two hours of use. It is compostable, and you can compost it even in your home composting along with your food scraps. The paper straw is produced from conserved trees and has been certified by FSC.

Certified:

Frequently Asked Questions

What is this paper straw made of?

Regular papers that are food grade and FSC certified.

Is the ink used for printing on the paper straw food grade?

It is food grade, eco-friendly and will not affect the beverage. Hence, you can enjoy your drink using this straw without any worry!

How long can it stand before it softens?

It can withstand 30-60 minutes contact with beverages before it softens. It is not recommended for beverages with temperature of more than 50 degrees Celsius.

How to store it properly?

Store it in a room with mild temperature and low humidity. High humidity and direct contact with water can affect the quality of the product.

Does it have a minimum order quantity?

The minimum order quantity for paper straw is 100,000 pieces. If you want to customize the design to meet your needs, the minimum order quantity is 500,000 pieces.

What to do after I finish using it?

You can discard it to the designated trash bin.

Rice Straw

Our rice straw is biodegradable and compostable. It biodegrades within month and home compostable. It is even edible, water soluble and nutritious, making it safe to be consumed by human or animal when it's leaked to the oceans. It can be used for food and non – food product and has two years of shelf life even without preservatives.

Certified:

- ISO22000
- HACCP

Frequently Asked Questions

What is this rice straw made of?

It is made of rice and tapioca. No plastic components, ever.

Is it edible?

It is completely edible. You can even boil it like noodles or spaghetti if you like! Even though it is edible, it does not alter the taste of your drink.

Is it biodegradable?

It can fully biodegrade and decompose in natural condition within 90 days. No need of specialised or industrial composting facility, just give it to your plants and it will become a fertilizer for your plant!

What certifications does this rice straw have?

Our factory holds HACCP and ISO 22000 manufacturing standard.

How long can it stand before it softens?

For cold drinks, 4-10 hours. For warm drinks: 2-3 hours.

How long is the shelf life?

You can store it up to 2 years as long as there is no direct contact with water, sunlight or bugs.

Disposable Wooden Cutlery

This disposable wooden cutlery can be used to replace single use plastic cutlery for different kinds of events. It is biodegradable and home-compostable so it is safe for our earth! It is also made of natural material so it is safe for your body! Keep your event stay away from plastic waste by using this compostable cutlery!

Frequently Asked Questions

What is this cutlery made of?

It is made of thin birch wood.

Is it biodegradable and compostable?

Yes, it is 100% biodegradable and home compostable since it is made of wood. To compost it, you can chop it into smaller pieces and put in your home composter.

What should I do after using it?

We suggest to compost it directly or discard it to organic waste bin instead.

Is it completely safe for the environment?

Yes it is completely safe for the environment since it is made of natural material.

Is it food grade?

Yes, our wooden cutlery is made of food-grade material that's free from toxic and dangerous chemicals.

Can I wash it and reuse it again?

Our wooden cutlery is intended for single use, so we don't recommend you to wash it and reuse it again.

Can I put my logo on the products?

Yes, we can branding our products with your logo with minimum purchase of 2,000 pieces.

How to store the products before I use it?

The products must be stored in low humidity and mild room temperature (around 25C). High humidity can affect the quality of the products, as molds and microorganisms may grow.

How long is the shelf life?

The shelf life of the products is 2 years after production.

Bamboo Straw & Cutlery

Our bamboo straw and cutlery are locally sourced and handmade. This reusable and compostable items can be a perfect replacement for single use plastic straw and cutlery. These are easy to clean and bring and perfect for any kind of drink.

Frequently Asked Questions

What is this straw and cutlery made of?

It is made of bamboo stem, with coating to keep the bamboo from rotting.

Is it reusable?

Yes! Please use it as many times as possible until it gets broken.

How to clean and store it?

Wash it with water and soap and dry it properly. For the straw, you can wash it with water and brush or add soap if you want. Please store the bamboo cutlery and straw in a dry place to avoid microorganism growth.

Why is the size of the bamboo straw inconsistent?

The size is different and unique as the bamboo size is different in nature, we can't control the thickness and diameter of all bamboo stems. If you want the size to be consistent, there will be extra charge as it will require more manpower.

Rethink Kit

We also provide sets of zero waste kit called rethink kit that can help you to rethink your plastic use and start to take on a zero waste journey. You can use this kit for your personal use, gift for your relatives or souvenirs for your events and help us to get more people to live sustainably. This rethink kit is a part of our collaborative campaign, Rethink that aim to get 1,000,000 people to switch their plastic items with sustainable items.

Rethink Kit

Package 1

Code number: ER01
Dimension: 8 x 24 cm
Items: Bamboo straw, brush, cutlery pouch

Package 2

Code number: ER02
Dimension: 8 x 24 cm
Items: Bamboo cutlery, bamboo straw, brush, cutlery pouch

Package 3

Code number: ER03
Dimension: 29 x 35 cm
Items: Bamboo cutlery, bamboo straw, brush, cutlery pouch, produce bag

Package 4

Code number: ER04
Dimension: 30 x 35 x 15 cm
Items: Bamboo cutlery, bamboo straw, brush, cutlery pouch, tumbler, tote bag

Frequently Asked Questions

Do I have to use this “rethink plastic” design?

Yes, as it is a part of our campaign to raise awareness about plastic waste issue. By joining our campaign, you also contribute in changing people's lifestyle to be more sustainable!

Is it possible to customize the design for my order?

Yes it is, but you still need to put rethink plastic logo and social media channels. The minimum quantity for a customized design is 500 pcs and extra charge IDR 2,000 per piece for order below 500 pcs (for 1 color and one side printing).

Is it possible to put our logo?

It is possible to add engraving of your logo or your design on the straw and put your logo on the pouch together with our 'rethink.plastic' logo. Minimum order quantity for customization is 500 pieces. For order less than 500 pieces, extra charge for customization is IDR 2,000 per piece (for 1 colour and one side printing on pouch).

What to do after the product becomes broken?

You can compost the bamboo straw and cutlery and recycle the pouch, produce bag and tumbler.
